Application Notes

Specificity

AP-2 α Antibody detects endogenous levels of total AP-2 α protein.

Description/Data:

The sequence-specific transcription factor activator protein 2α (AP- 2α) is required for normal growth and morphogenesis during mammalian development. This includes development of the Neural Crest. Decreased or loss of AP- 2α expression has been observed in many different types of human cancers including breast cancer, ovarian cancer, melanoma and prostate cancer.
