

Recombinant Human PDGF-AA

Datasheet

Catalog Number: PR27061

Product Type: Recombinant protein

Source: *E. Coli*

Amino Acid Sequence: The sequence of the first five N-terminal amino acids was determined and was found to be Ser-Ile-Glu-Glu-Ala.

Description/Molecular Mass: Platelet-derived Growth Factor AA Human Recombinant is a homodimeric, non-glycosylated, polypeptide chain containing 2 x 125 amino acids and having a total molecular mass of 28511 Dalton. PDGF-AA is purified by proprietary chromatographic techniques.

Biological Activity: The ED₅₀ calculated by the dose-dependant proliferation of murine BALB/c 3T3 indicator cells (measured by ³H-thymidine uptake) is < 1 ng/ml, corresponding to a Specific Activity of 1 MIU/mg.

Purity: Greater than 97.0% as determined by:
(a) Analysis by RP-HPLC.
(b) Analysis by SDS-PAGE.

Format: The protein was lyophilized with no additives.

Reconstitution: It is recommended to reconstitute the lyophilized Platelet-derived Growth Factor-AA in sterile 18M-cm H₂O not less than 100µg/ml, which can then be further diluted to other aqueous solutions.

Storage: Lyophilized Platelet-derived Growth Factor AA although stable at room temperature for 3 weeks, should be stored desiccated below -18°C. Upon reconstitution PDGF-AA should be stored at 4°C between 2-7 days and for future use below -18°C. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).

Please prevent freeze-thaw cycles.
