

## Epithelial Basal Medium

---

**Catalog #:** ECM002

**Size:** 500ml

**Storage:** 4°C.

---

### GENERAL INFORMATION

Basal Medium for the growth of epithelial cells other than keratinocytes. When supplemented with growth factors or fetal calf serum (0.2-2.0% dialyzed), this medium is selective for epithelial cells.

The medium is for research use only and not approved for human or animal use or for application in any in vitro diagnostic procedure. Storage of the medium and supplements, please note that the basal medium has to be stored at 4°C up to 8°C. If supplemented, the supplement has to be stored at -20°C. Protect from light for a longer time period.

### Preparing and Stability

Thaw the supplement mixture at 37°C before adding to the basal medium. After thawing please rinse the bottle and the tube with 70% ethanol as protection. Remove ethanol excess before opening the cap of the tube. After adding the supplement mixture to the basal medium slew carefully to get a homogenous medium. Please be careful not to touch the tube or bottle interior threads with your fingers. Please avoid long term exposure to light because some components are light sensitive. Also do not warm up the medium over 37°C. All this protects your medium against contamination or degradation of essential components.

*\*Epithelial Muscle Basal Media must be used for in vitro research purposes only. Our products are not authorized for human use, for in vitro diagnostic procedures, or for therapeutic procedures.*

Shipped with ice packs.

### FOR RESEARCH USE ONLY
