Revision Date: 09.03.2020

Lot No.: 4801-

Description	 StarGate® Acceptor Vector designed for gene transfer into the polyhedrin gene locus of AcMNPV DNA by homologous recombination containing the following elements: Polyhedrin promoter for high-level expression in insect cells. Co-transfection with BacPAK6 linearized AcMNPV DNA (Clontech) or with circular flashBAC modified AcMNPV DNA (Oxford Expression Technologies) allows the generation of recombinant baculovirus at very high efficiency through reconstitution of an essential gene (ORF 1629) and elimination of wild-type virus to great extent. Ampicillin resistance and ColE1 origin of replication (pUC) for propagation in E. coli. The expressed recombinant protein will be secreted into the medium.
