

Lung Fibroblast Cell Medium

Catalog #: CCM005 Size: 500ml

Storage: Store the medium at 2-8°C. **Shelf Life:** 12 months

pH: 7.4 Format: Liquid

Color: Clear

GENERAL INFORMATION

Our Human Lung Cell culture media has been optimized for the culture of Human Fibroblasts and Mesenchymal Stem Cells-Pre-Adipocytes. It can be use model to study wound healing, toxicology, or basic cell biology. It contains no antimicrobials and no phenol red since these components can cause cell stress and "masking effects" that may influence experimental results.

The medium is subjected to comprehensive quality control tests using primary human cells. Each lot is checked for growth-promoting activity, adherence rate, and typical morphology of the tested cells. Approved in-house lots are used as a reference. In addition, every lot of media is tested for the absence of microbial contaminants (fungi, bacteria, mycoplasma).

Storage Condition: Store the medium at 2-8°C.

*Lung Fibroblast Cell Medium must be used for in vitro research purposes only. Our products are not authorized for human use, for in vitro diagnostic procedures, or for therapeutic procedures.

Shipped with dry ice and ice packs.

FOR RESEARCH USE ONLY
